Portfolio ateeqmalikz01-dev.github.io | GitHub | LinkedIn

PROFILE

Computer Science student and aspiring penetration tester with two completed cybersecurity internships. Practical experience includes security labs, a penetration testing report, Python tools, and phishing analysis. Founder of AR Cyber Academy, currently preparing for eJPT.

TECHNICAL SKILLS

Security testing

Web application testing, vulnerability assessment, reconnaissance, authentication and access control testing.

Tools and platforms

Burp Suite, Nmap, TryHackMe, and PortSwigger Web Security Academy.

Programming

Python, HTML, CustomTkinter, security scripting.

Networking

TCP/IP, subnetting, routing and switching, VLANs, network security.

Reporting

Security findings, technical reports, bug tracking, team collaboration.

LANGUAGES

English

Urdu

RELEVANT EXPERIENCE

Ethical Hacking Intern

Axeronix Technologies | Remote | Jul - Sep 2026

- Completed an eight-week internship with practical work in TryHackMe rooms and PortSwigger labs.
- Produced a full penetration testing report on axeronixtech.com.
- Served as Group Leader for the internship project, guiding the team and managing deliverables; received a Certificate of Excellence.

Cybersecurity Intern

DecodeLabs | Remote | Jul - Aug 2026

- Built cybersecurity projects and completed collaborative technical tasks during the virtual internship.
- Applied structured problem-solving to practical security work; earned a completion certificate and letter of recommendation.

SELECTED SECURITY PROJECTS

PhishYou

Collaborator - Security and Testing | BiSecT

Contributed to an AI-assisted platform for authorized security-awareness simulations. The email MVP connects campaign context, LLM-generated messages, interaction monitoring, and contextual reply handling.

Axeronix Sentinel

Internship team project | In development

Group Leader for the final ethical-hacking internship project: a full-stack platform focused on automated reconnaissance, cloud exposure assessment, and security scanning.

AR Cyber Academy Scanner

Python | Nmap | CustomTkinter

Built a desktop interface for Nmap that brings host and service results, scan output, statistics, and report exports into one workspace.

EDUCATION

BS Computer Science

Sep 2024 - Present

NFC Institute of Engineering and Technology
Multan, Pakistan

FSc Pre-Medical

Sep 2022 - Apr 2024

Nishat College of Science
Multan, Pakistan

LEADERSHIP

Founder

AR Cyber Academy

Founded AR Cyber Academy and developed its Python-based network scanning tool.

Group Leader Award

Axeronix Technologies
Aug 2026

Certificate of Excellence recognizing leadership and delivery of the ethical-hacking internship project.

COMMUNITY WORK

Social Services Intern

Alkhidmat Foundation Pakistan
Jul 2026 - Sep 2026

Completed a six-week hybrid internship under the Volunteer Management Department on 12 September 2026, with learning in personal branding, digital entrepreneurship, social innovation, and AI media verification.

CERTIFICATIONS AND CERTIFICATES

Certified LLM Security Professional

Red Team Leaders | 15 Jul 2026

CLLMSP certification; completed the requirements and passed the examination.

Junior Cyber Defender

National CERT Pakistan (PKCERT) | 3 Jul 2026

Certificate of completion for the Junior Cyber Defender online course.

Bug Bounty

Indian Cyber Club Technologies | 29 Jun 2026

Certificate of completion for three months of bug bounty training.

ADDITIONAL PROJECTS

PhishGuard

HTML | Offline phishing analysis

Built a browser-based tool that reviews email headers, suspicious links, and scam language, then explains its phishing risk score in a readable report.

Password Strength Checker

Python | Password security

Created a command-line checker using entropy, character variety, Unicode awareness, and checks for common passwords and repeated patterns.

C1pher-5ui7e

Python | Cryptography fundamentals

Developed an educational Caesar-cipher tool exploring shift keys, character handling, and reversible encryption and decryption.

TECHNICAL TRAINING

Web application testing - Indian Cyber Club, Feb - May 2026.

Ethical hacking coursework - CEH curriculum, May - Dec 2025.

Networking coursework - CCNA curriculum, Apr - May 2025.

Security foundations - CompTIA Security+ course, Udemy, Jan - Mar 2025.

IT foundations - CompTIA A+ course, Udemy, Sep - Dec 2024.

PortSwigger Web Security Academy practice ongoing since May 2026. Preparing for eJPT and developing network, web application, and Active Directory exploitation skills.
